## Process Chilled Water System

# BURT | PROCESS EQUIPMENT

## PCW System Features & Options

- Flow rates from 10-1000 gpm standard
- 316SS pump available in simplex, duplex, and triplex configurations
- Bag or cartridge filters available in simplex and duplex options
- Pump VFDs
- Plate and frame or shell and tube heat exchangers
- Redundant heat exchangers for critical process applications
- Onboard chillers are available when other cooling methods are unavailable
- Chemical reagent addition
- Thermoplastic break tanks
- 316SS or corrosion resistant plastic piping
- PLC control for user adjustability and BAS integration
